PROFESSIONAL SUMMARY

Native Cebuano speaker and Computer Engineering graduate (Cum Laude) with strong analytical, technical, and communication skills. Experienced in technical documentation, troubleshooting, and evaluating system performance with meticulous attention to detail. Regular user of AI tools including ChatGPT, Claude, and Whisper for research, content evaluation, and productivity. Passionate about improving AI systems through accurate language evaluation, cultural understanding, and structured feedback. Seeking to contribute as a Cebuano Language Specialist supporting the development of high-quality AI models.

LANGUAGES

Cebuano — Native

English — Professional Working Proficiency

Filipino — Fluent

CORE COMPETENCIES

Language & Communication

- Native Cebuano & Fluent English
- Written Communication
- Technical Documentation
- Research & Analysis

AI & Quality Evaluation

- AI Output Evaluation
- Prompt Testing
- Quality Assurance
- Attention to Detail

Tools & Platforms

- ChatGPT, Claude, Whisper AI
- Microsoft Office Suite
- Google Workspace
- Windows 10/11

Technical (Supporting)

- Computer Troubleshooting
- LAN Setup & Networking
- Python (OOP basics)
- Web Development (HTML, CSS, JavaScript)

AI TOOLS & EXPERIENCE

Tools Used:

- ChatGPT, Claude (Anthropic), OpenAI Whisper

Applied Skills:

- Prompt Engineering & Refinement
- AI Response Evaluation for accuracy and clarity
- AI-assisted Research & Transcription
- Workflow Automation & Documentation

PROFESSIONAL EXPERIENCE

On-Call Technical Assistant | Asian College of Technology — Network & Technical Services 2022 – 2024

- Diagnosed technical issues through careful analysis and documented findings with clear, structured written communication.
- Maintained a high level of accuracy and consistency while resolving technical issues across 20–30+ systems through structured problem-solving.
- Performed OS installation, system setup, and software configuration across multiple workstations with thorough documentation of each process.
- Diagnosed and resolved LAN connectivity problems and device configuration issues, applying systematic troubleshooting methods.
- Conducted routine preventive maintenance, increasing system reliability and performance.
- Coordinated with team members through help desk ticket workflows to ensure timely resolution and service continuity.
- Maintained detailed troubleshooting records and system configurations to support knowledge base accuracy and quality.

Freelance Technical Support Specialist | Independent Contractor 2022 – Present

- Assessed and resolved hardware and software issues for 10+ clients with careful attention to detail and client communication.
- Delivered clear verbal and written explanations of technical issues and solutions to non-technical clients.
- Configured and troubleshot home and small-office network setups, documenting configurations for future reference.
- Provided remote support via TeamViewer and AnyDesk, applying structured communication for effective remote assistance.

KEY PROJECTS

AI Productivity & Evaluation Practice — Ongoing

- Evaluated AI-generated responses for clarity, accuracy, and cultural appropriateness in both Cebuano and English contexts.
- Used ChatGPT, Claude, and Whisper for transcription, documentation, and workflow automation across personal and freelance tasks.
- Refined prompts iteratively to improve AI response quality and consistency.
- Applied structured feedback methods to identify gaps in AI output.

Multi-Purpose Training Board for Circuit Visualization — Arduino · Embedded Systems · Electronics

- Designed and built an interactive training board for circuit analysis and electronics education.
- Integrated modules covering series/parallel circuits, logic gates, and binary number systems.

- Programmed Arduino-based analog and digital I/O using sensors and microcontroller logic.
- Led circuit design, wiring, and component integration; validated reliability through iterative testing.

EDUCATION

Bachelor of Science in Computer Engineering — *Cum Laude*

April 2026

Asian College of Technology, Cebu City

Senior High School Diploma

June 2022

Asian College of Technology, Bulacao Campus, Talisay City, Cebu

CERTIFICATIONS

-
- CompTIA A+ — In Progress (Currently Pursuing)

OBJECTIVE

Seeking a freelance opportunity as a Cebuano Language Specialist where I can combine native language expertise, attention to detail, and AI tool experience to improve the quality of language models and contribute to responsible AI development.
